

HIV AND LATINOS

Not all Hispanics/Latinos with HIV are getting the care they need.
235,600 Hispanics/Latinos living with HIV in the US in 2014

www.cdc.gov/actagainstaids

* Had 2 tests at least 3 months apart to measure level of virus in the body.

** Virus at low enough level to stay healthy and reduce transmission risk. Based on most recent test.

Get Tested. Get in Care. Stay in Care. Be Healthy.
